Update 240315 - User experience improvements

Our church system now includes a series of improvements designed to enhance user experience, navigation and personalization.

Image Optimization Options

Administrators now have the ability to selectively apply image optimization, preserving the quality of images with lower resolution when necessary.

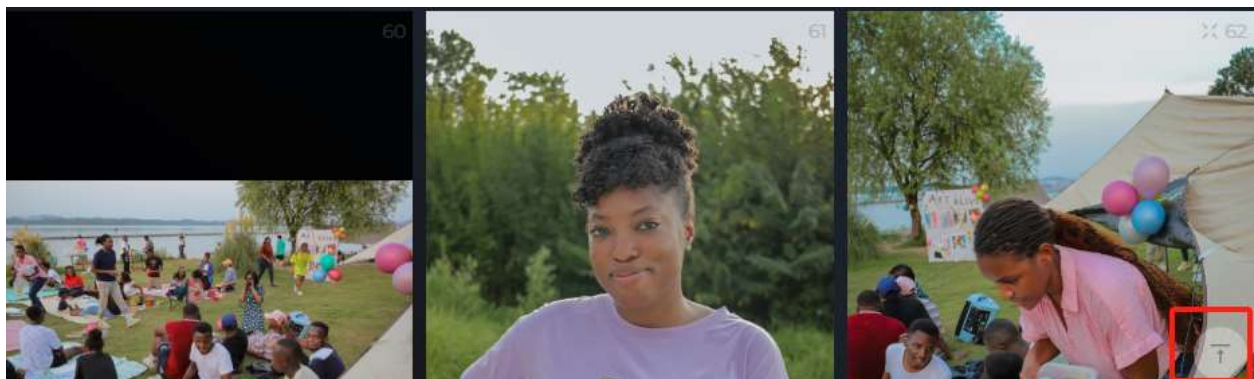

For images that look poor quality when using the optimized thumbnails, these new options allow the admin to opt out for the photo optimization:

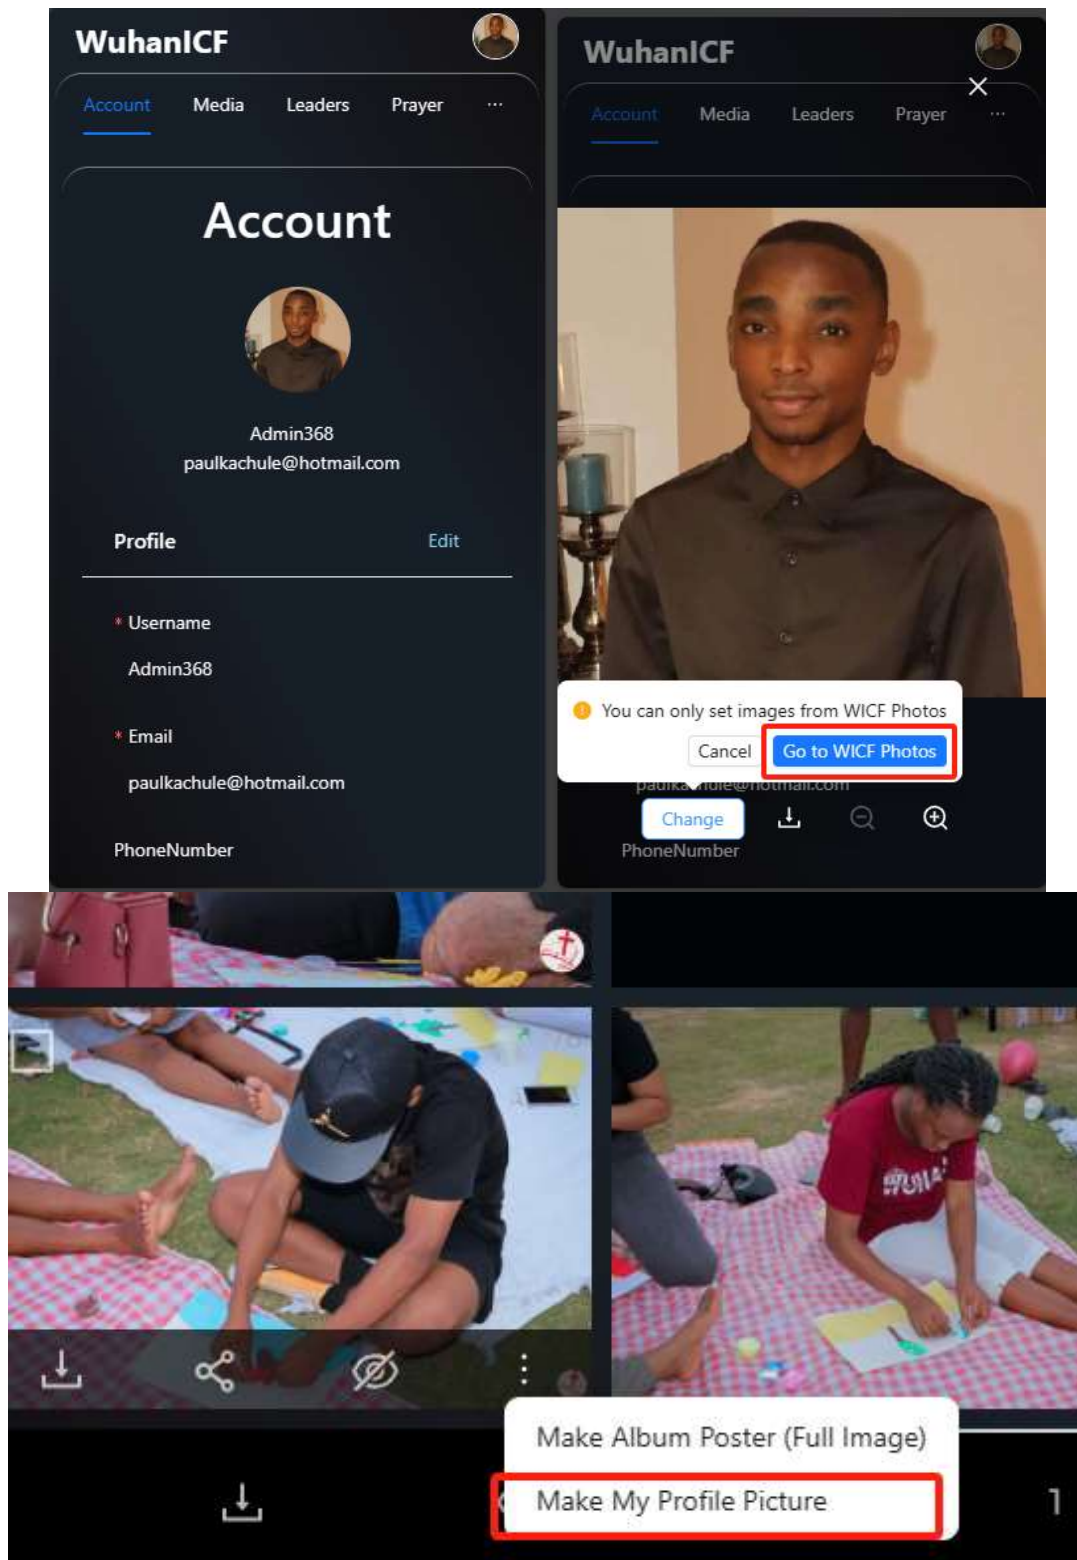

"Back to Top" Button for WICF Photos

A new "Back to Top" button has been added across WICF photos sections.

Custom User Profile Images

Users can now customize their profiles by setting a profile picture directly from WICF photos.

Update 240314 - Prayer Request Management

Our church system has been updated with a new features : Prayer Request Management.

Prayer Request Submissions

Members of the WICF can now easily submit prayer requests through the church system.

WuhanICF

WICF Prayer request

Feel free to send all your prayer requests, we will pray with and for you. God bless you!

Email Notifications

Members of the prayer ministry can now receive notifications when a new prayer request is submitted.

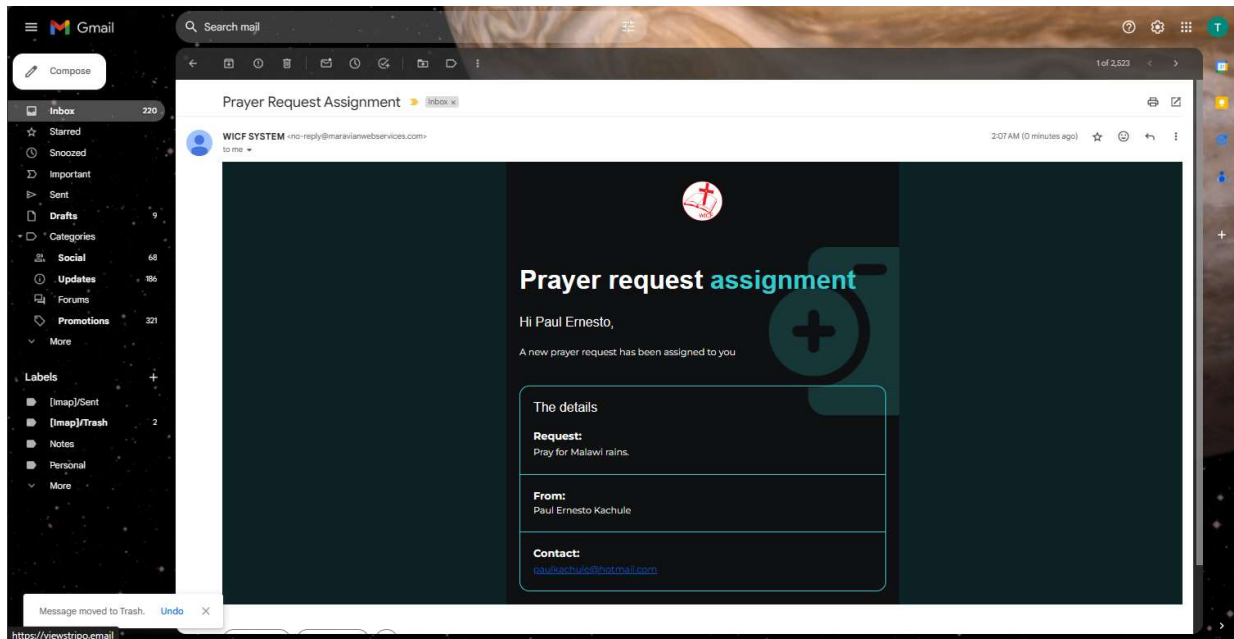

Prayer Assignments

Assignments of specific prayer requests to a member of the prayer team for intercession has also been added.

Prayer Assignment Emails

Members receive notification when they have been assigned a prayer request.

The inspiration for this update came from the growing need for efficient communication between church members and the prayer ministry. Additionally, it aims to streamline the process of managing and tracking prayer requests within our church community.

Update 240310 – WICF Photos & Feedback

The church system has been updated with a new features:

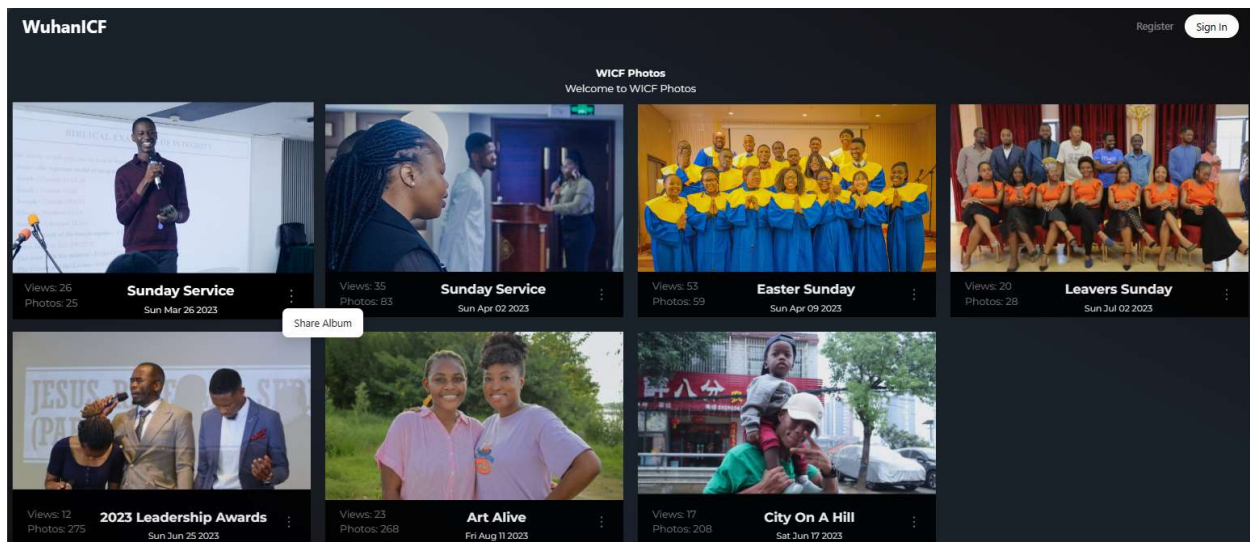

WICF Feedback

Introducing the WICF feedback section where members can submit their feedback

A screenshot of a web form titled 'WICF Feedback Form'. At the top left is the 'WuhanICF' logo. In the center is a red cross icon with 'WICF' written below it. The text 'Please provide us with feedback or suggestions' is centered below the icon. The form has two input fields: 'Your Name (Optional)' and 'Message'. The 'Message' field is marked with a red asterisk. A blue 'Submit' button is at the bottom center.

WICF Photos Albums

Members can now access large amounts of photos from regular Sundays and special events that are too many to share on social media.

WICF Photos Downloads and sharing

From any album, users can be able to share or download an optimized version of the photos or the full version of the images.

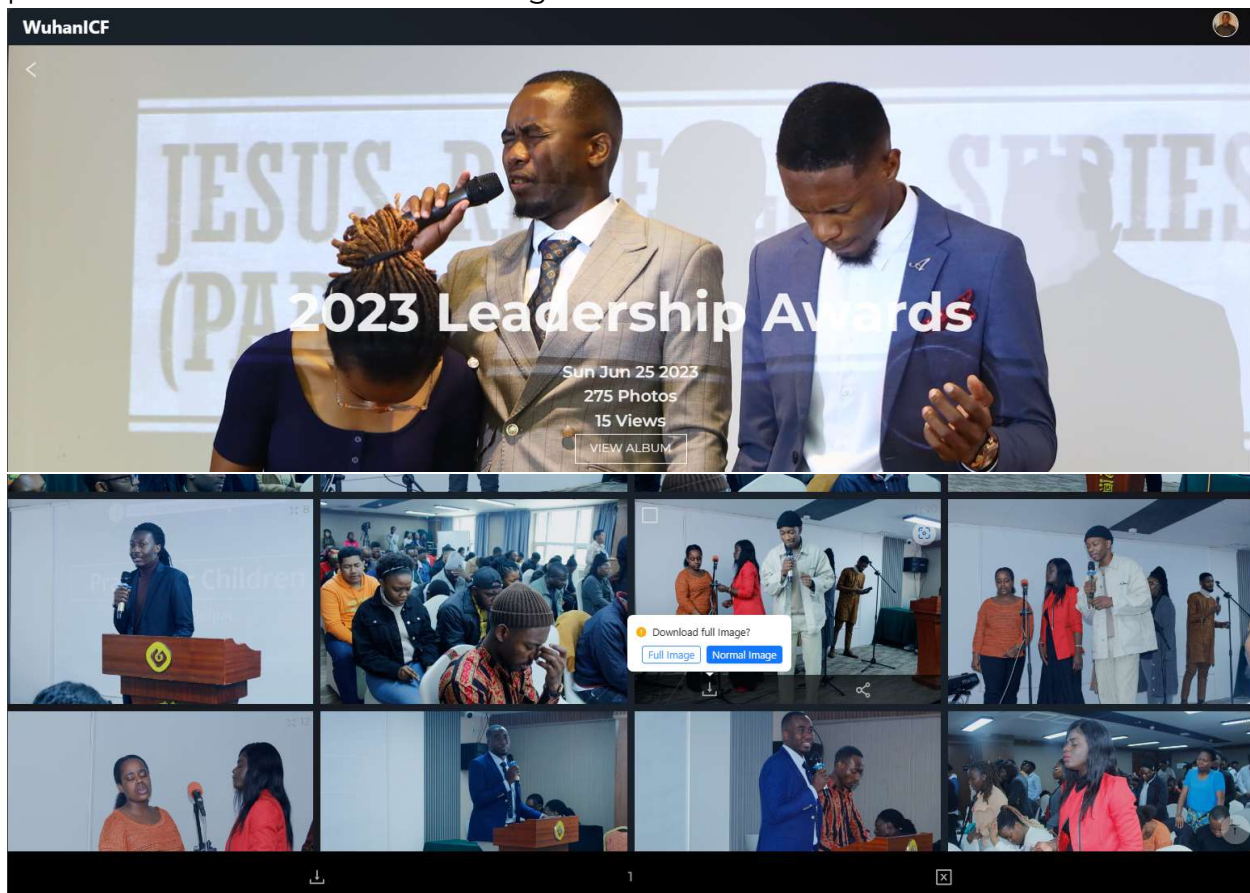

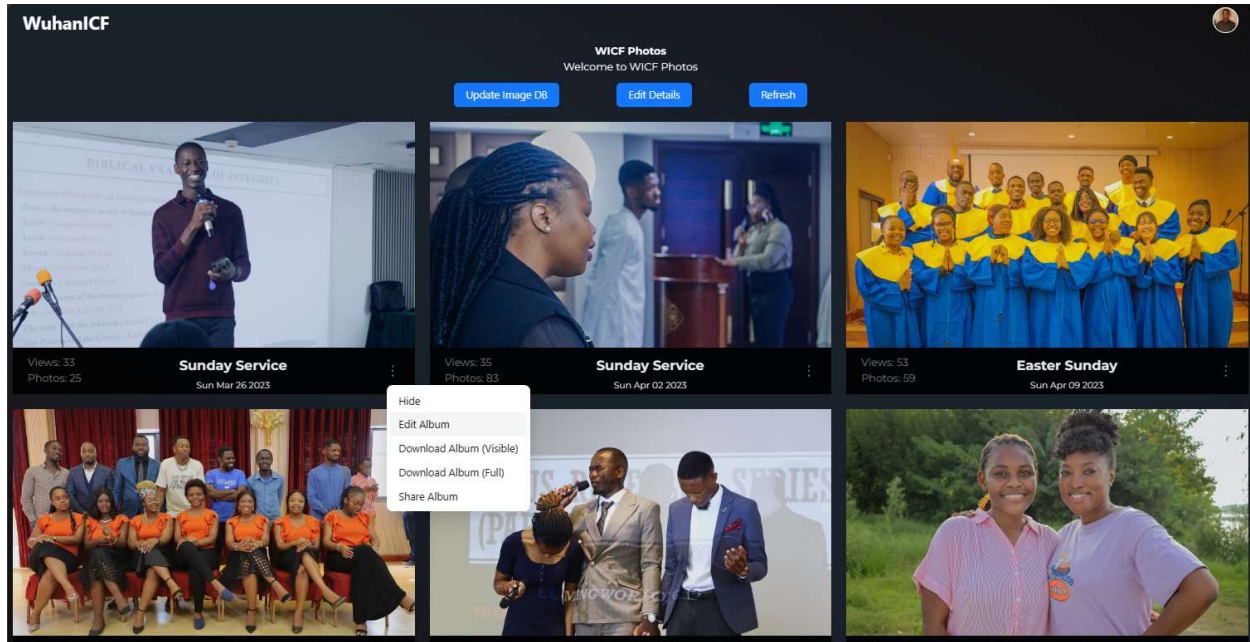

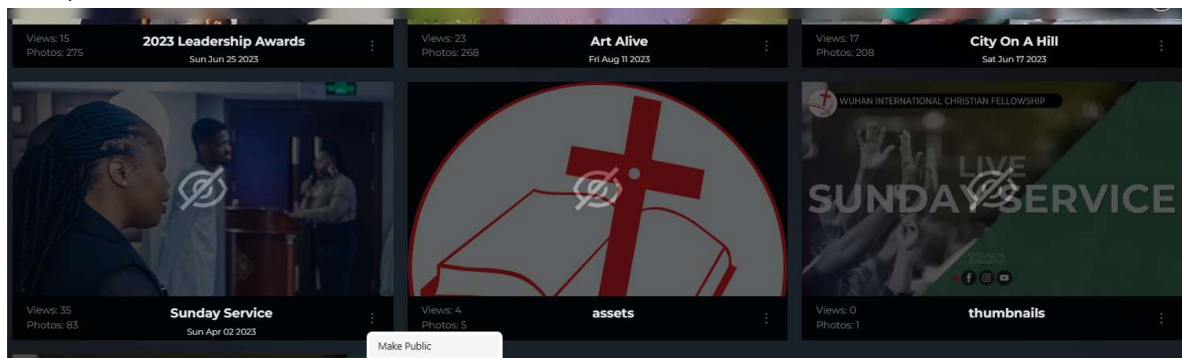

Photo Album Management

Admins or media members have some management features:

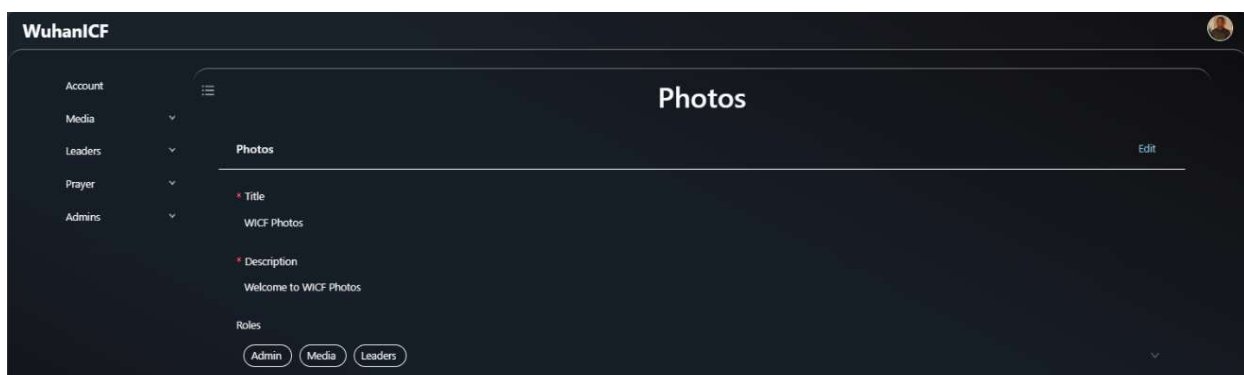

- Update Image DB: which checks the images from the server and updates or adds albums if they are new ones.

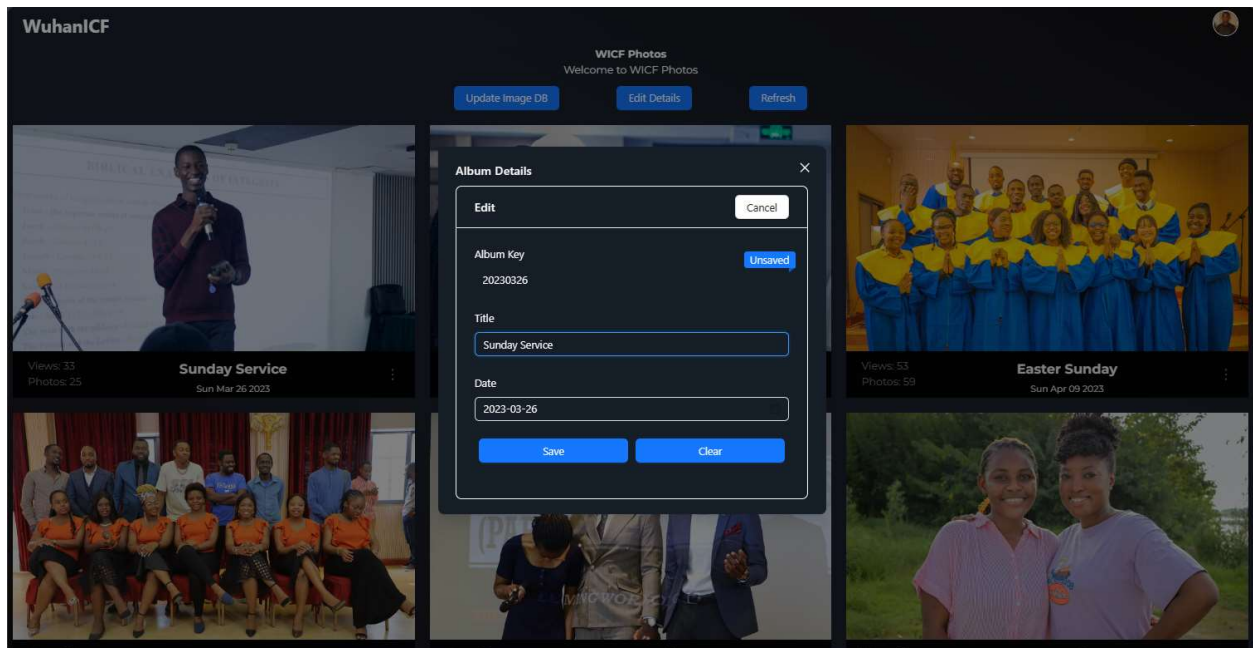

- Hide / Show albums

- Edit the Photos Section Title, Description and roles which can be able to manage photos

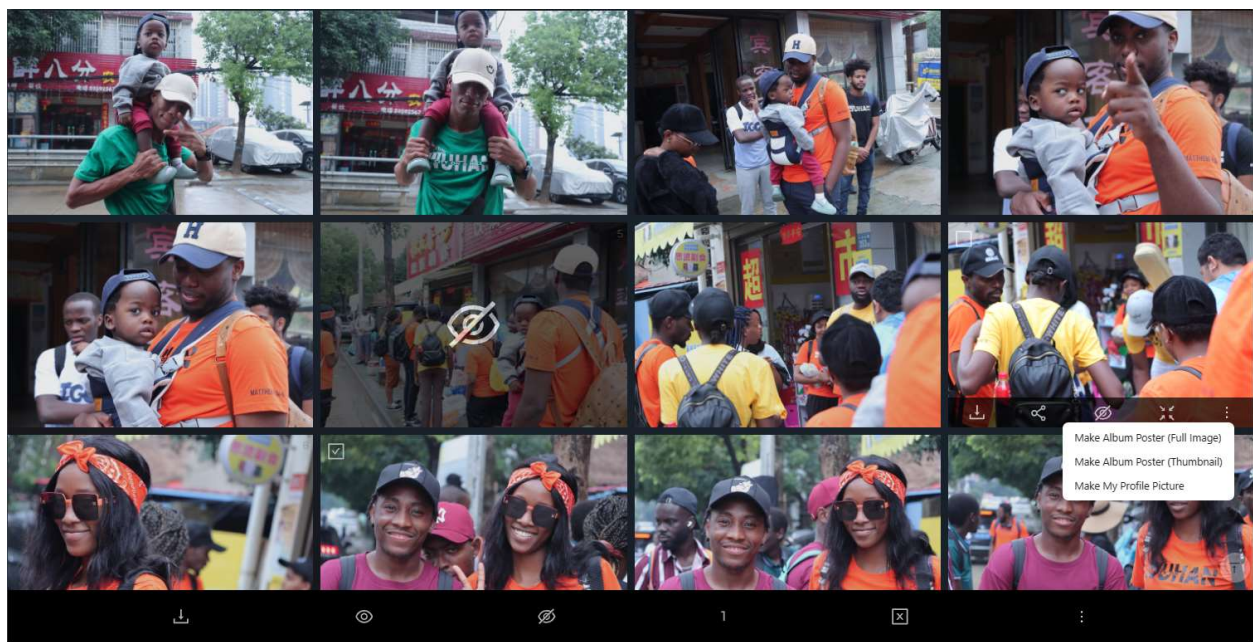

- Edit photo album details and dates.

Single Photo Management

There are also some features for managing single images in an album.

- Hide / Unhide images
- Change the poster for the album

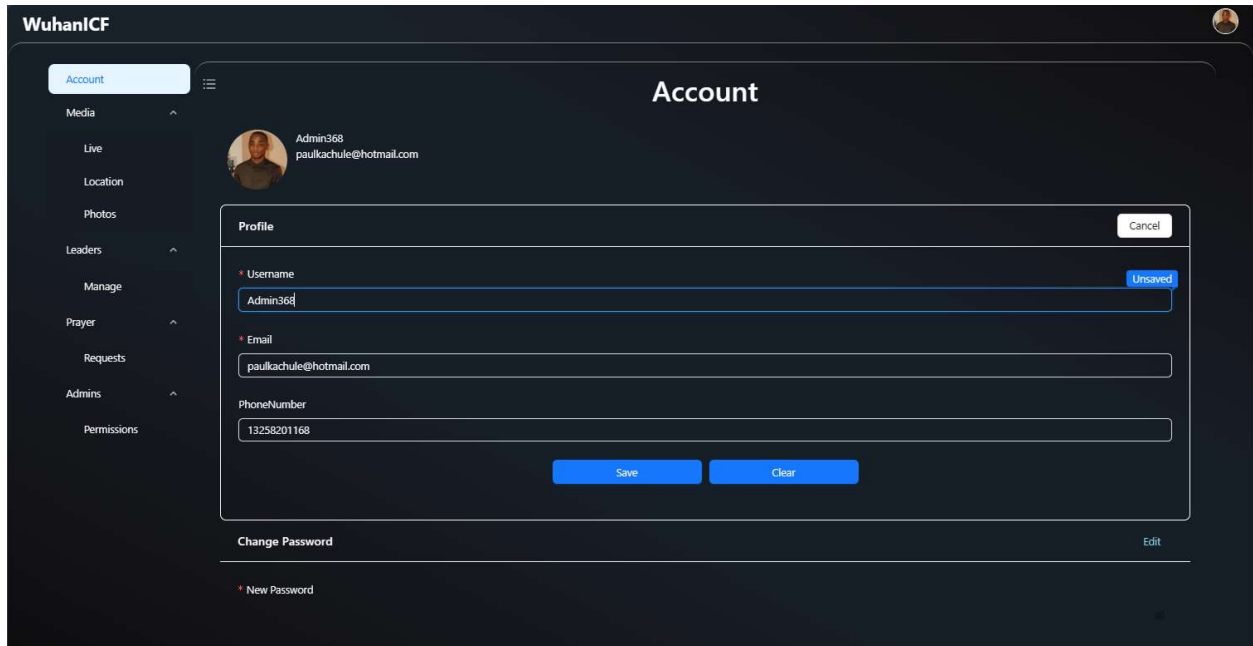

Previously Established Features

Here are some previously established features of the Wuhan ICF System:

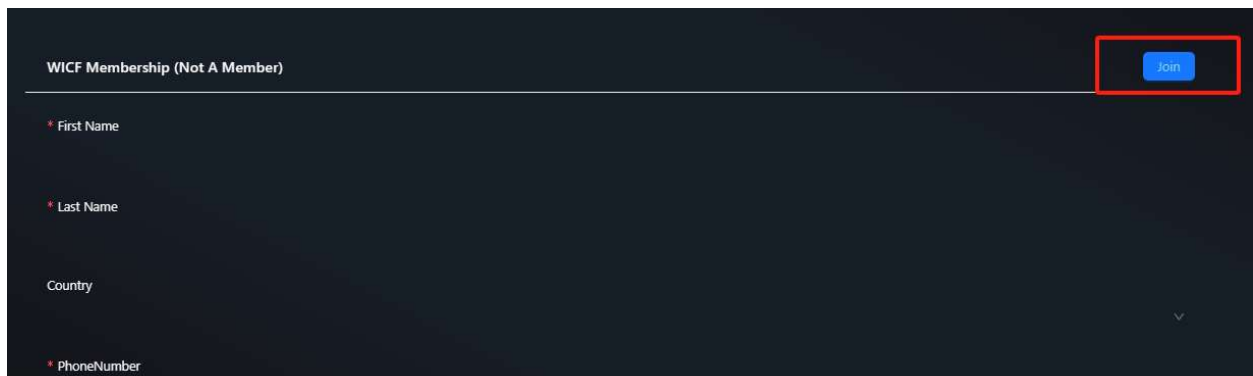

Account Management

Members can create and manage their accounts, update personal information, and change their password.

The screenshot shows the 'WuhanICF' application interface. On the left is a dark sidebar with a menu containing 'Account' (highlighted), 'Media', 'Live', 'Location', 'Photos', 'Leaders', 'Manage', 'Prayer', 'Requests', 'Admins', and 'Permissions'. The main content area is titled 'Account' and displays a user profile for 'Admin368' with email 'paulkachule@hotmail.com'. Below the profile is a 'Profile' form with fields for 'Username' (containing 'Admin368'), 'Email' (containing 'paulkachule@hotmail.com'), and 'PhoneNumber' (containing '13258201168'). The form has 'Save' and 'Clear' buttons at the bottom. A 'Cancel' button is in the top right of the form. Below the form is a 'Change Password' section with a 'New Password' field and an 'Edit' link. An 'Unsaved' indicator is visible next to the Username field.

When a member makes an account, they can then join the WICF by filling the WICF membership information.

The screenshot shows the 'WICF Membership (Not A Member)' form. At the top right, there is a blue 'Join' button highlighted with a red rectangle. Below the title, there are four input fields: 'First Name', 'Last Name', 'Country', and 'PhoneNumber', each preceded by a red asterisk indicating it is a required field.

If the Church already has information on the member it will ask you to verify if it is you and your information will be linked with your account

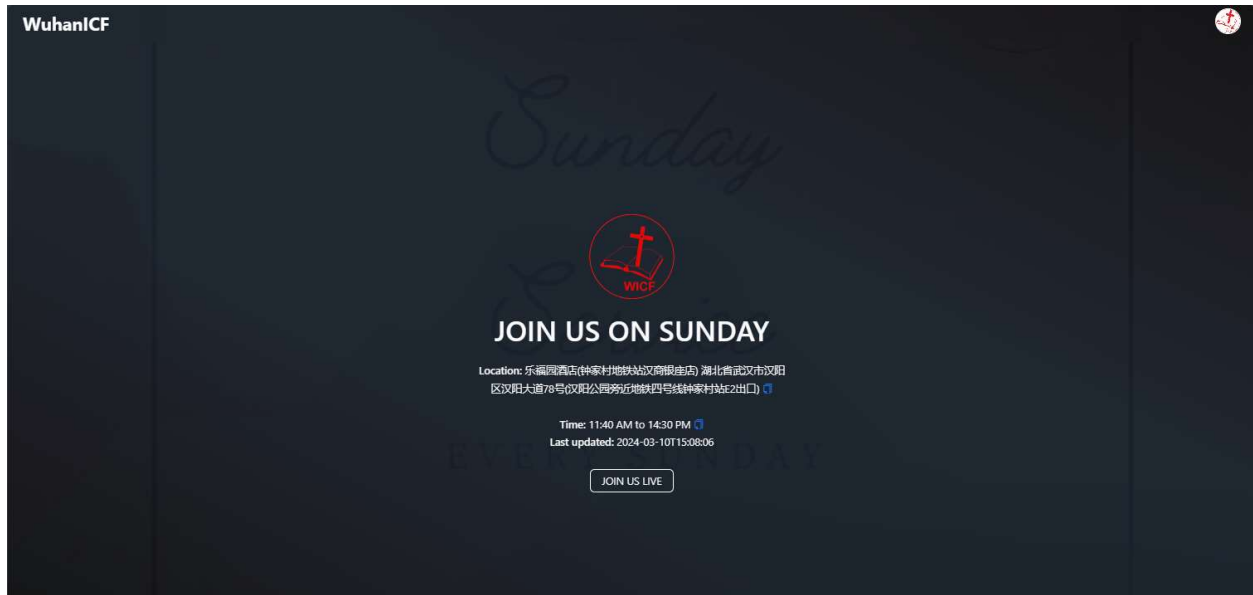

The screenshot shows a dark-themed user interface. At the top, a green notification bar with a checkmark icon says "Your Data was found". Below it, a modal dialog box with a yellow warning icon asks: "Are you Paul Ernesto Kachule? Would you like to link this information with your account?". The dialog has "Cancel" and "OK" buttons. In the background, the "Change Password" form is visible, with fields for "New Password" and "Confirm Password". Below the password fields, there is a section titled "WICF Membership (Not A Member)" with a "Join" button. At the bottom, there are input fields for "First Name" and "Last Name".

Then after saving you will be registered as an official WICF member.

The screenshot shows the "WICF Membership" form in a dark theme. The form contains the following fields and options: "First Name" (filled with "Paul Ernest"), "Last Name" (filled with "Kachule"), "Country" (filled with "Malawi" and a dropdown arrow), "PhoneNumber" (a masked input field), "Wechat ID" (a masked input field), "Birthday" (a date picker), "Marital_status" (a dropdown menu), and "Are you in China" (a toggle switch that is currently turned on).

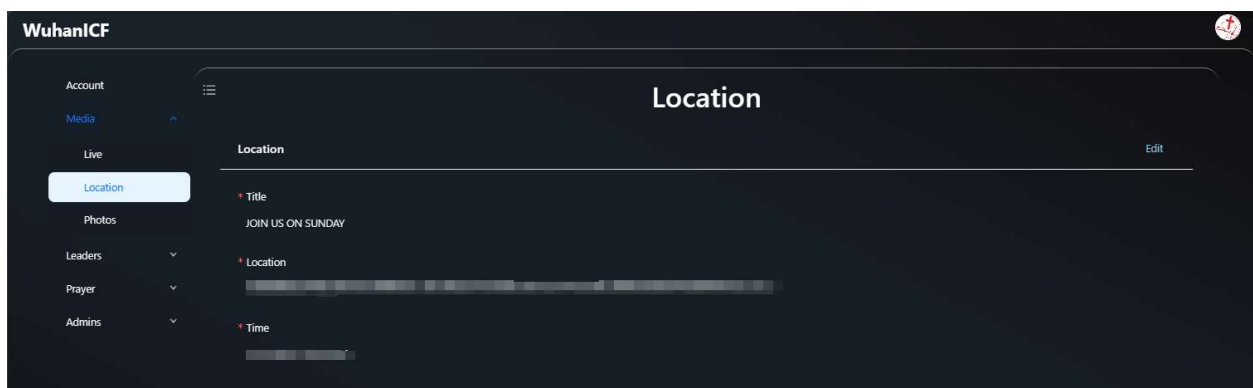

Sunday Location

Since our Sunday location changes, it is sometimes difficult to find where the new location is. We now have a permanent link where members can find the current church location that is only accessible to official registered WICF members for security reasons.

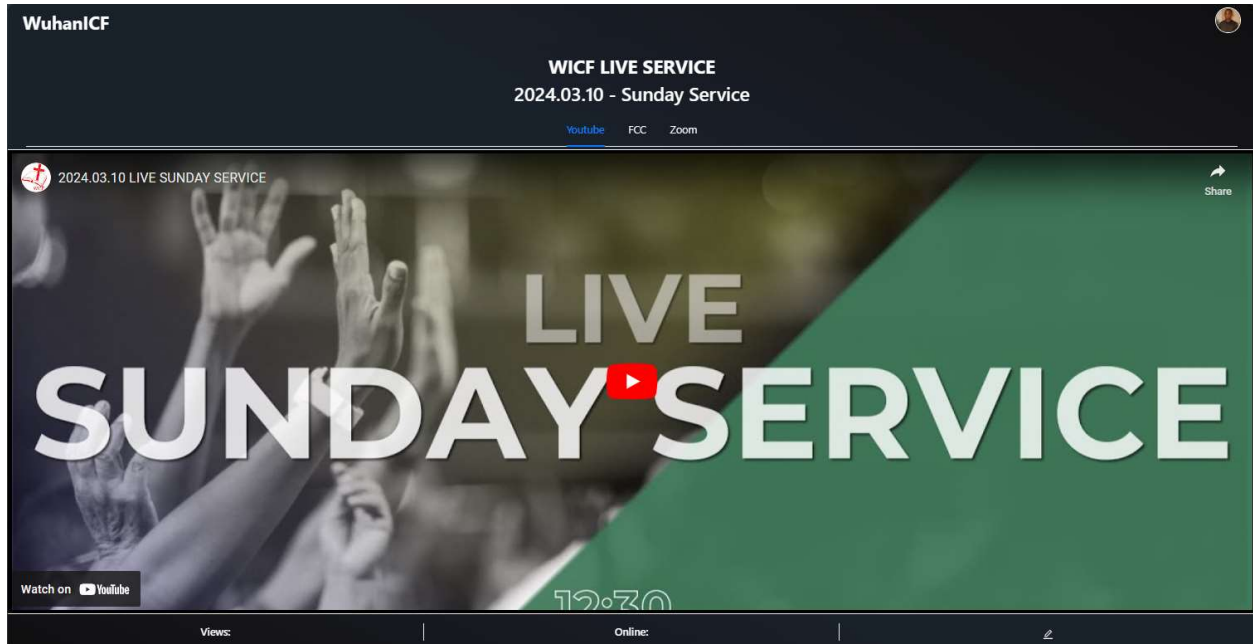

Sunday Location Management

Leaders and media members have the access to dynamically update and change the Sunday location so that the location link is updated.

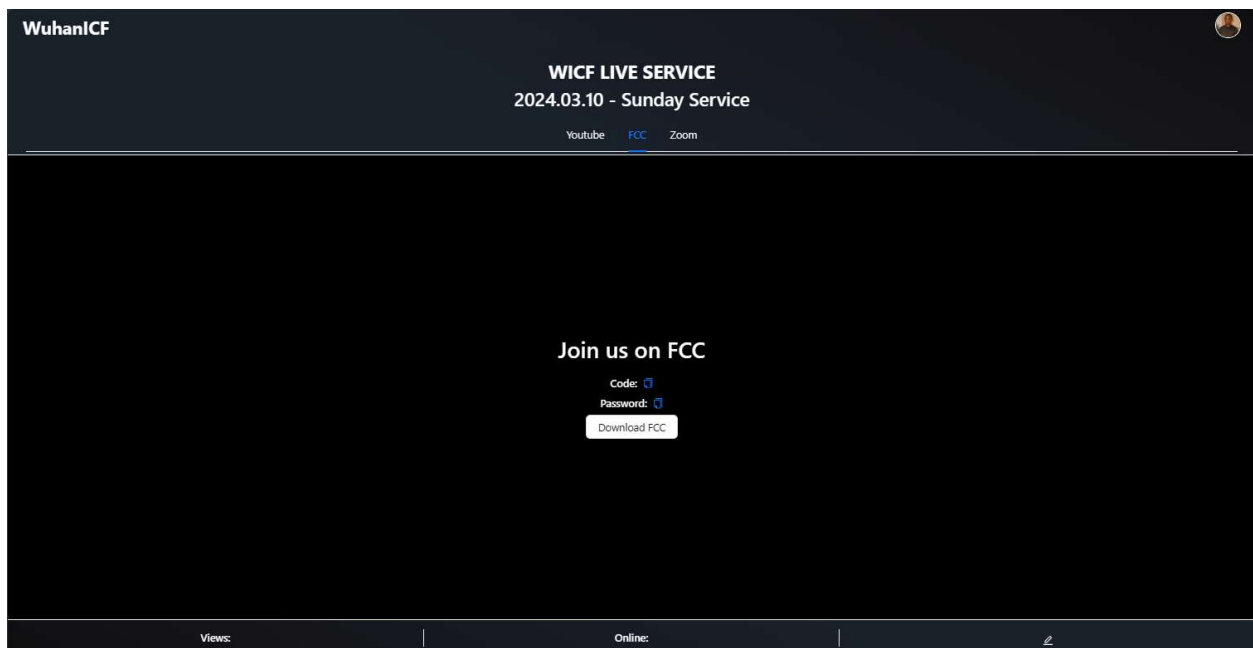

Sunday Live Streams

Normally on a Sunday there is a live stream on either YouTube, FCC or zoom, and it becomes difficult for church members to know which links or codes are being used.

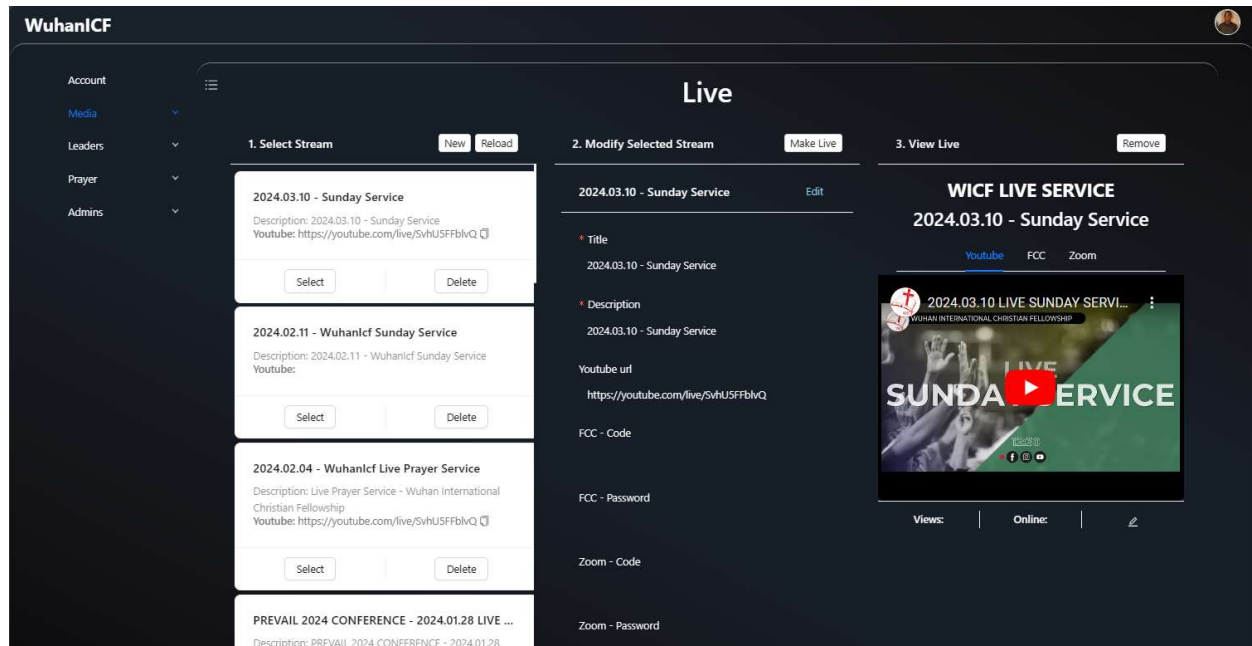

With the Wuhan ICF System, users can now easily access the live stream links and codes for Sunday services, ensuring they do not miss a Sunday service.

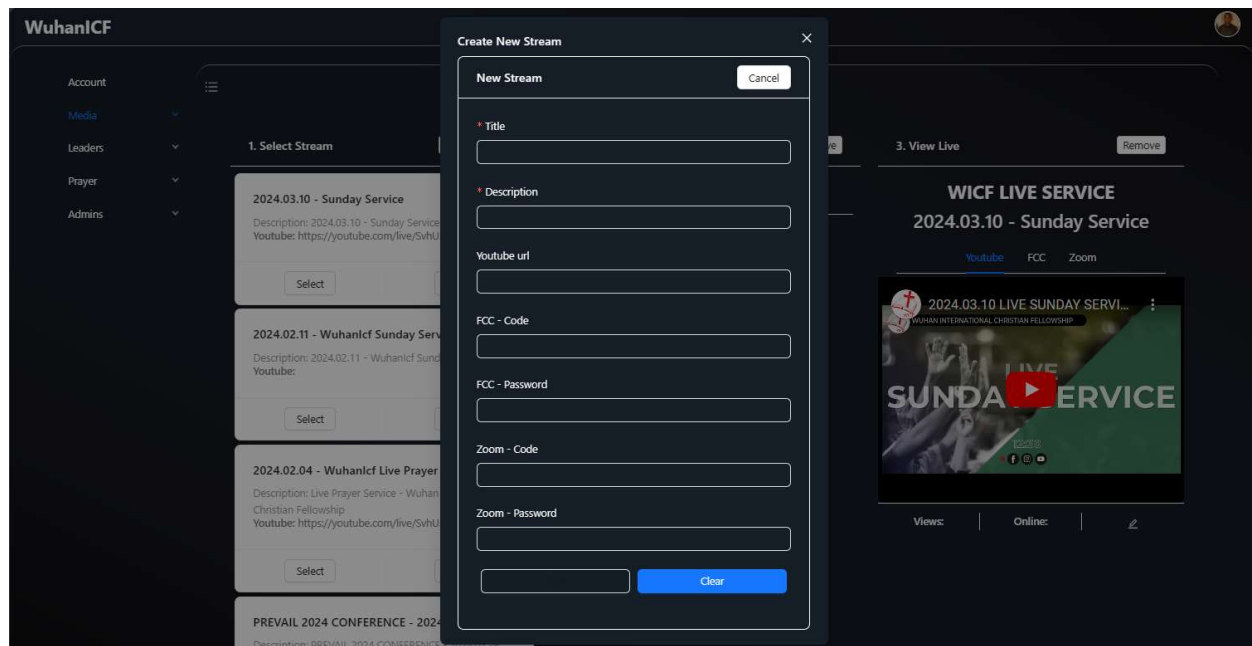

Sunday Live Stream Management

For the admins and media team, the church system now offers enhanced management capabilities for Sunday live streams.

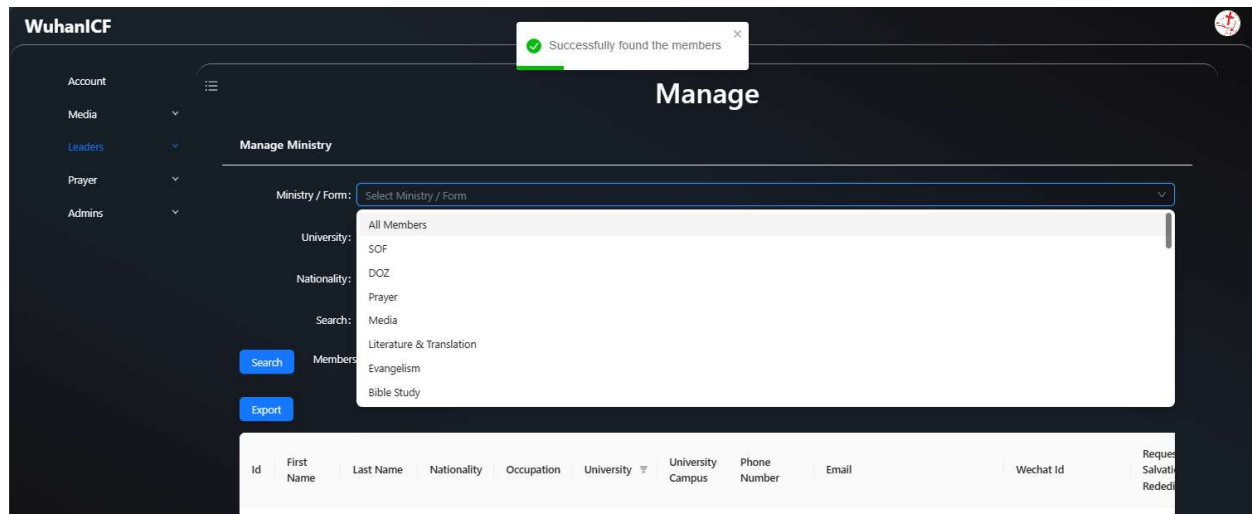

Admins and media team members can set, update, and manage the live stream, including adding descriptions, links, and meeting codes.

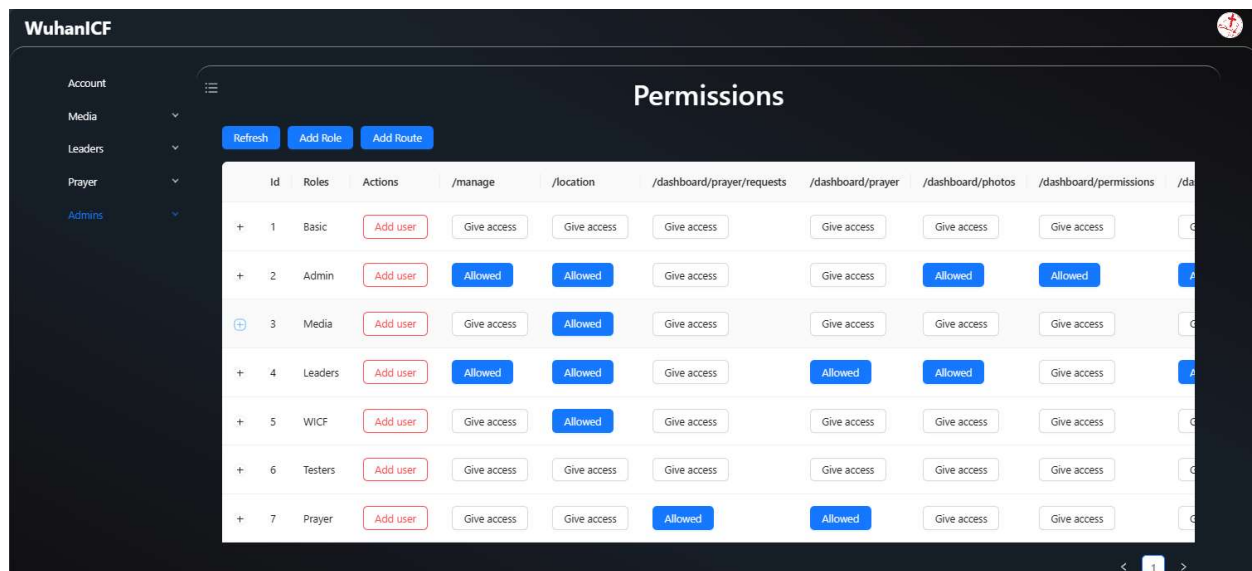

Leader Data Management and Export

The Wuhan ICF System now includes a feature for leaders to easily manage and export data related to their specific areas of responsibility within the church.

Permission management

The Wuhan ICF System now includes a permission management feature, allowing admins to grant specific access and permissions to different users within the system.

Admins should create the specific routes that require permissions, make the roles to assign those permissions, assign the routes to the specific roles and then assign the appropriate roles to users.
